Job opportunities at Alemnis

Alemnis is a small, high tech company situated in Thun, Switzerland, in the buildings of EMPA (Swiss Federal Laboratories for Materials Science and Technology). The working environment is highly stimulating surrounded by young, top scientists in materials science. Alemnis offers attractive social conditions, work flexibility and great opportunities for a young, creative and highly motivated engineer.

Working at Alemnis will give you a taste of the most advanced science with the thrill of industry!

As part of our continuing growth, Alemnis is currently looking for a:

Production & Applications Engineer

who will be based in Thun and have the following responsibilities:

- Development of new applications in collaboration with sales and R&D
- Sample testing in the Alemnis laboratory for prospective customers
- Demonstration of Alemnis equipment to prospective clients
- Assembly, test, calibration and integration of our products;

Minimum requirements:

- Suitable candidates must hold a Bachelor or a Masters degree in engineering (or equivalent) and at least 2 years experience.
- Good spoken & written English is a must; German and/or French is an advantage.
- Candidate needs to work autonomously, professionally and have excellent organisational skills
- Some international travel may be required

Please send your CV and cover letter to: info@alemnis.ch
